Reason for Allowance

1. The following is an examiner's statement of reasons for allowance:

Claims 1-25 are allowable over the prior art of record because none of the prior art of record teaches or fairly suggests a system or method for limiting a sensor current in a magneto-resistive sensor in a disk drive, comprising steps of inducing a current in a read signal path coupled to the sensor first, and then shunting the current from the read signal path with a shunt path, wherein the shunt path is opposite the sensor on the read signal path. It is noted that, the closest prior art, Balakrishnan (USPN 5,754,369) teaches a head suspension that has an integrated self-shielding trace conductor array for supporting and electrically interconnecting a dual element read/write head to electronic circuitry in a disk drive. However, Balakrishnan is not directed to limiting sensor current in a recording head of a disk drive.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
